

SYSTEM OVERVIEW

This information is for the System Administrator or Manager who creates freshness labels for the system.

The system includes:

Label Design

PC Application to create new custom formats or modify standard formats.

Edit

Application to create product data files, batches, timers, manage media files, and add custom formats.

Configure

Application to setup users, store address/logo, send/receive files, configure printer/tablets or groups, and network settings.
Set printers to push/pull updated data or configuration files.
Get log, configuration, and data files from your system.

Prep

System Application for printing freshness labels, viewing recipes, and watching videos.

System Requirements

To install and use Edit, Configure, and Label Designer, your PC must meet these requirements:

Supported Operating Systems: Microsoft® Windows® 10, 64-bit

Processor: I5, 4th generation

Memory (RAM): 8 GB minimum recommended

Hard Disk Space: 10 GB minimum recommended

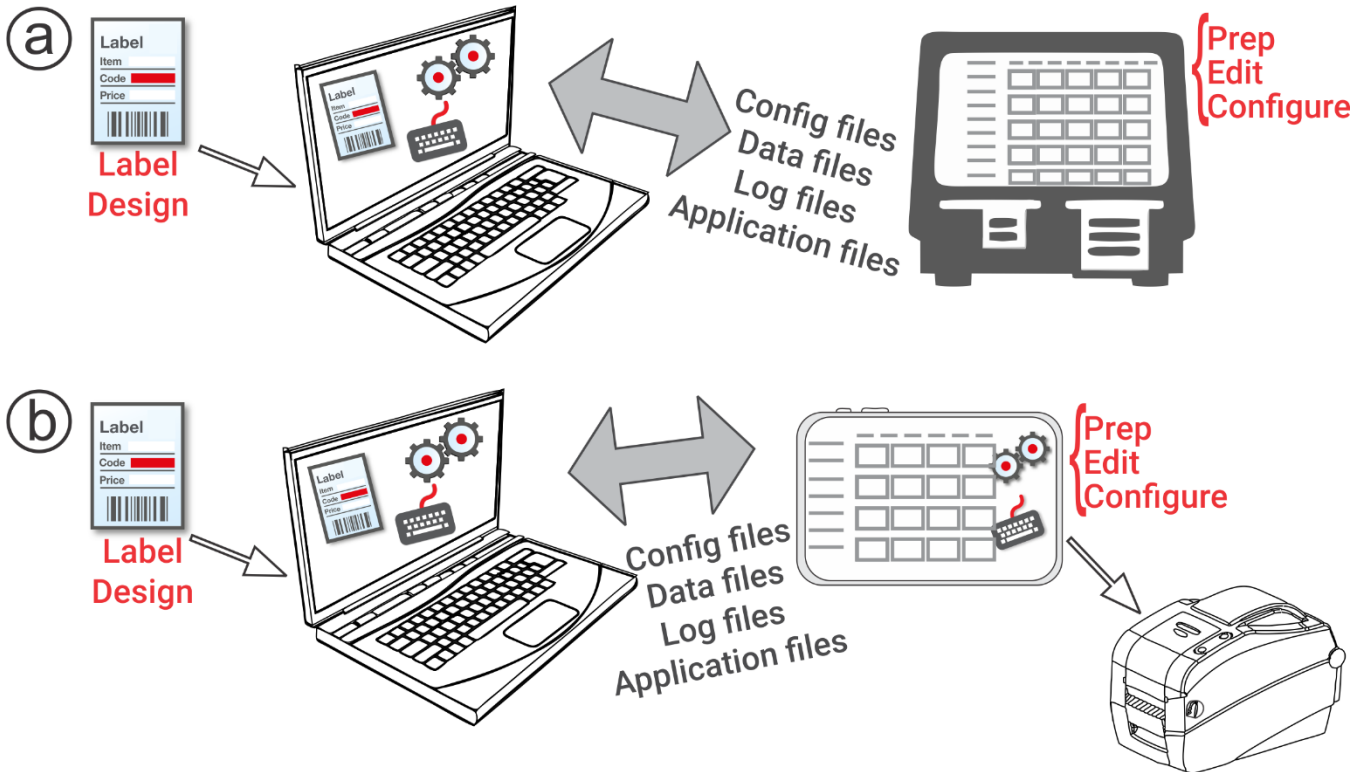

Some combinations of computer hardware and versions of Windows® Operating Systems require you to run these applications as an Administrator. Right click on the desktop icon and select Run As Administrator.

As a manager or system administrator, follow these steps to get up and running with the system (a or b):

1. Install the applications (**Configure & Edit** and **Label Design**) on your PC.
 To print labels with fixed fields in a different language, install the **Configure & Edit** PC application in the language you need.
2. Create a data file using **Edit** with your product buttons, batches, and timers. If our standard formats do not fit your needs, use **Label Design** to create a custom format. Use **Edit** to add the custom format and define buttons using either the custom or standard formats.
3. Configure the printer/tablet settings (including WiFi and LAN), manage printer/tablet groups, define a store address/logo, create users and manage their permissions with **Configure**. For the tablet system, pair the printer using your tablet's Android™ Bluetooth® settings. Select the 9442 model (9442*_*****), then enter the PIN (0000).
4. Send the configuration file and the data file to the printer/tablet (or a group) using **Configure**. To transfer files to the tablet system, your tablet and PC must be on the same network. Use your tablet's Android™ WiFi settings to establish the network connection.
5. Create reminders for your operators using **Prep**. The operators use **Prep** to print freshness or other types of labels.

Menu Icons

Icon	Description	Icon	Description	Icon	Description
	File		More		Applications
	Menu		Drop down		Help and About

Icon	Description	Icon	Description	Icon	Description

About the System's Users

There are three types of user defaults: operator, manager, and admin (administrator). Login as the default Admin to create users. The default users may be removed once a new Admin is created.

User	Description	Default Password
Default Operator	Most basic-level user with access to Prep . Can print labels and <i>may</i> be able to update product data files on the system.	The operator password (0000) is optional. The system admin decides if operators must login.
Default Manager	Middle-level user with access to Prep . They <i>may</i> be able to update product data files, use Edit , configure printers, etc.	abcd
Default Admin	Most advanced-level user with access to <i>all</i> applications. This user sets the permissions for operators and managers.	1234

We recommend changing the default passwords and/or defining your own users.

Over the Air (OTA) Core Updates

The printer has our *pre-configured* Cloud server address to receive core updates, similar to the way mobile phones receive operating system (OS) updates. The printer receives a .ZIP file. The printer's core system includes the print engine and firmware.

Updates must be processed in sequential order. *For example*, a printer at Version 1.1 must update to V1.2, then to V1.3 (latest). You cannot update from V1.1 to V1.3.

To receive OTA updates:

1. Turn on the printer.
2. Login in as an **Admin**.
3. Connect the printer to a network.
4. Tap the apps menu icon ().
5. Tap Home. Then, tap the Android icon. 
6. The printer checks for updates and displays a notification if one is available. Tap the notification. - OR -
Go to Android™ Settings, About Printer, Additional System Updates.
7. Tap **Update Now**. Follow the on-screen instructions. The printer turns off then on while processing the update. You see a message "Installing System Update."

On the printer, applications remain when the core is updated.

Tablet System Application Updates

For the tablet system, the user will be notified if the application requires an update.
